

RING SIZE CHART - ANDREA SHELLEY

1 inch - 25mm

INSTRUCTIONS

1. Print this page with printer scale set to 100%.
2. Make sure the page printed properly by checking the one inch (25mm) line in the top corner.

FINGER METHOD

1. First, you'll need string. Find a piece that's 6" long and made of non-stretch material.
2. Wrap the string comfortably around the finger where you would like the ring to sit. For most rings that would be the base of the finger - or for midi rings, above the first knuckle.
3. Use a pen to mark the exact point where the string overlaps itself.
4. Lay the string on the lines below to determine your ring size. If you are between sizes, order the larger size or a half size up.

Fingers can change size during the day. You'll get the truest measurement later in the day and when your hands are warm. If your knuckle is much larger than the base of your finger, measure both the base of your finger and your knuckle find the average size.

RING METHOD

This is the best method to use when buying a ring as a gift or when trying to match the size of a ring you already own.

1. Find a ring that fits the finger you want your new ring to fit (for a gift, borrow a ring from the intended recipient).
2. Place the ring over the circle making sure that the inside of the ring lines up with the outside of the circle. If you are between sizes, order the larger size.

OTHER TIPS AND INFORMATION

- To ensure a comfortable fit on a wider band (above 3mm) move up a size.
- The sizes listed are standard American sizes. Different countries may use other sizing scales.
- The average woman's ring size is about 6. The average man's ring size is about 10.
- Your dominant hand is usually about a half size larger than your non-dominant hand.
